

How To Choose the Best Tyres For Your Vehicle ?

Selecting the Right Tyre

1. Your safety comes first - always!
2. Comfort and quality of ride
3. Confidents of driving
4. Life span of tyres
5. Economy

Determine How Many Tyres You Need ?

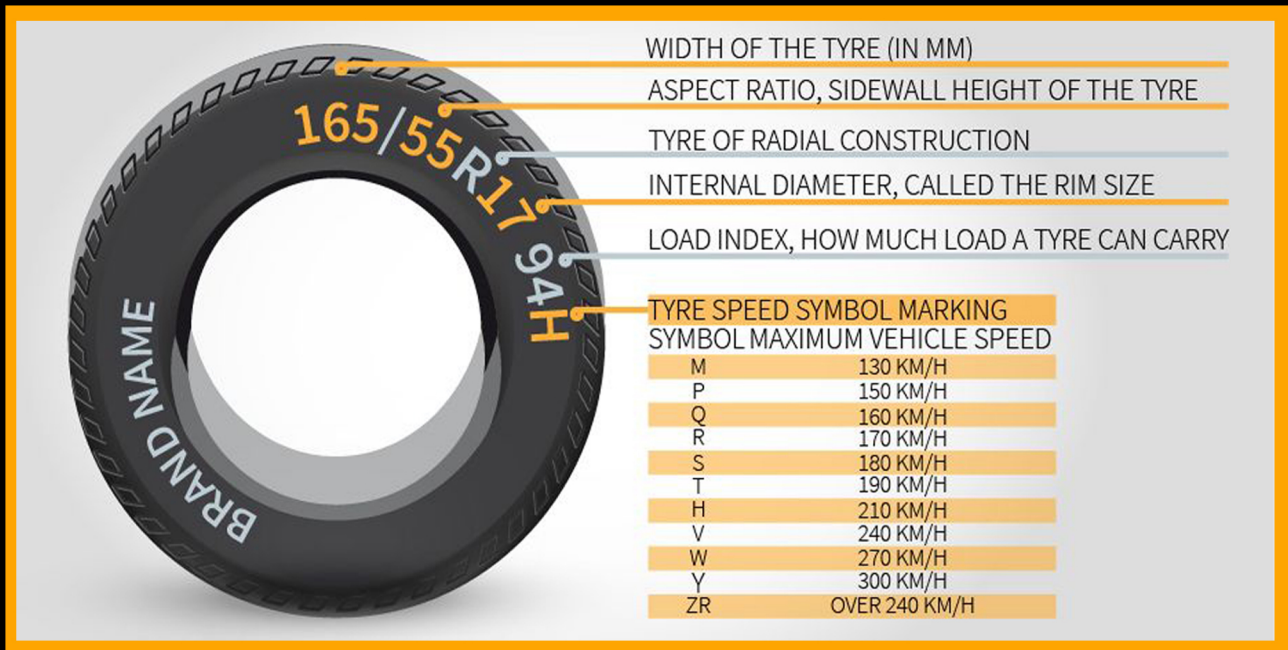

- If you need one tyre (due to damage, a defect, irregular wear, etc.) it is recommended that you replace it with a tyre that has a similar brand, line, speed rating, and load capacity to your three remaining tyres.
- If you need two tyres due to poor or irregular wear, replace the tire with ones of similar or better quality.
- Replacing all four tyres is the best case scenario, as you are open to a wide range of options

How to determine the Tire Size ?

- Most people replace their old tires with the same size that was on the vehicle
- Changing tire size can often improve the ride and performance of a vehicle

Selection of Right Tyre

Determine the Tyre Size

- Most people replace their old tires with the same size that was on the vehicle. If
- Changing tire size can often improve the ride and performance of a vehicle

Consider Performance and Speed Ratings

Most people are aware of speed ratings. Simply put, you need to buy a tire with the appropriate speed rating for your vehicle.

TYRE CARE & MAINTENANCE - For maximum life and Performance

To obtain maximum life and performance, tyre/tube care and maintenance is very important for proper tyre/tube care & maintenance, KCM TYRES recommends the following,
